TallyCheck

by Cenango (Pvt) Ltd

ACCOUNTING · INVOICING · PAYROLL · FOR WINDOWS

Your books. Your PC. No internet needed.

Complete double-entry accounting, invoicing, stock and payroll in one Windows app. Your company data stays on your own computer — not in someone else's cloud.

Works offline
Everything runs on your PC. No monthly cloud subscription to stay online.

Your data stays yours
Books, payslips and documents are kept on your own computer, with encrypted backups.

Built for real accounting
Double-entry ledger: every transaction balances, posted entries can't be edited or deleted.

Any country, any currency
Your own tax codes, currency, number and date format, and financial year.

WHAT YOU CAN DO

Everything a growing business needs

Sales & customers
- Professional invoices with your logo; print or save as PDF
- Customer payments, part payments and credit notes
- Customer statements and overdue (AR ageing) list

Purchases & expenses
- Supplier bills, expenses and payments
- Debit notes and supplier (AP ageing) list
- Any payable account, e.g. telephone or rent

Banking
- Import bank statements from CSV or Excel
- Match each line to a payment, invoice or expense in one click
- Bank reconciliation, foreign-currency bank accounts

Products & stock
- Products and services with stock levels
- Average cost and cost of goods sold, posted for you
- Discounts and shipping on invoices

HOW IT WORKS

Up and running in three steps

1 Install
Download and install on your Windows PC in about a minute.

2 Set up your company
A short guided setup: name, logo, country, currency and taxes.

3 Start working
Send invoices, record bills and run payroll — reports update as you go.

MORE INSIDE

Payroll, reports and control

Employees & payroll

- Employee profiles, documents and staff loans
- Sri Lanka: EPF, ETF, PAYE, payslips, EPF C Form, ETF form, bank advice
- United States: federal tax, social security, Medicare, FUTA/SUTA, Form 941/940/W-2 figures
- Each pay run posts to the books automatically

Reports

- Profit & loss, balance sheet, cash flow, trial balance
- Compare with the previous period or last year
- Click any figure to see the transactions behind it
- Tax return figures; export any report to Excel

Taxes & currencies

- Your own tax codes: VAT, GST, sales tax, tax groups, withholding tax
- Invoices and bills in foreign currencies
- Exchange gains and losses worked out for you

Security & control

- Users with roles and permissions; optional two-step sign-in (2FA)
- Activity log of who did what
- Lock the books after closing a period
- Encrypted, password-protected backups

Connections (optional)

- Bring in orders and payouts from Shopify, WooCommerce, PayPal and Stripe
- Ask Claude AI about your books, with your permission and read-only by default
- Goes online only for what you switch on

Office network

- One main PC keeps the books
- Colleagues sign in from their own PCs over the office network
- Each with their own user and permissions
